Non-word spelling errors

- Non-word spelling error detection:
 - Any word not in a **dictionary** is an error
 - The larger the dic
- Non-word spellin
 - Generate **candidates**: real words that error
 - Choose the one which is best:
 - Shortest weighted edit distance
 - Highest noisy channel probability

Real word spelling errors

- For each word w , generate candidate set:
 - Find candidate words with similar *pronunciations*
 - Find candidate w
 - Include w in cand
- Choose best candidate
 - Noisy Channel
 - Classifier
